My Curiosity Journal

A place to catch your questions before they fly away. Write what you wondered, guess the answer, then find out.

How it works

1. Something makes you wonder? Write it down.
2. Guess the answer first. Guessing is part of science.
3. Find out: look in 100,000 Whys, ask someone, or test it.
4. Write or draw what you learned.
5. Every answer gives you a new question. Write that one too.
